MAXIFORT

Complete in Trace
Elements and
Vitamins

Contains
Prebiotic

Support for
Prevention

MAXIFORT is a multivitamins, minerals and essential amino acids premix oral solution for daily supplementation.

MAXIFORT constituents are fundamental for maintaining health, growth and reproduction system. All constituents play important roles in many biological reactions and their correct interaction supplies all mineral and vitamin requirements and helps preventing adsorption, metabolism and excretion troubles, regardless the differences among species.

Thanks to THEPAX® addition, MAXIFORT helps enhancing the intestinal functionality.

THEPAX® optimizes the use of food because it acts directly on the metabolism. In monogastrics' gut, it reduces the incidence of abnormal fermentations and the subsequent production of toxins. Administering THEPAX®, an increase of feed intake and of feed conversion index is observed, making it a smart solution in case of recovery after antibiotic treatments or under stress conditions, accelerating the restoring of normal ingestion levels.

THEPAX® increases the performance, thus reducing the unit production cost.

POULTRY

APPLICATION:

MAXIFORT thanks to its composition is recommended for daily feed supplementation, as it:

- Supports treatment in case of severe hypovitaminosis;
- Supports treatment in any case of severe stress conditions;
- In layers and broilers, it is strategic in prevention of cannibalism;
- In growing animals, it helps to develop immune system, improve neuro-muscular and skeletal system and modulate basal metabolism;
- Supports to maintain optimum performance and fertility, in all breeding stocks.

COMPOSITION

Vitamins, provitamins and substances with similar effect

Vitamin A (E 672)	20,000,000 IU	Arginine (3c 3.6.1)	154 mg
Vitamin D3 (E 671)	2,000,000 IU	Cystine	26 mg
Vitamin E (3a 700)		Glycine	178 mg
(all-rac-alpha-tocopheryl-acetate)	8,000 IU	Isoleucine	164 mg
Vitamin B1 (thiamine monohydrated)	3,000 mg	L-Hystidine (3c 3.5.1)	76 mg
Vitamin B2 (riboflavine)	2,400 mg	Leucine	315 mg
D-Panthenole	6,000 mg	Proline	625 mg
Vitamin B6 (pyridoxine HCl)	1,200 mg	Serine	239 mg
Vitamin B12 (cyanocobalamin)	6 mg	Tyrosine	90 mg
Nicotinic acid amide (nicotinamide)	12,000 mg	L-Tryptophane (3.4.1)	216 mg
		Valine (3c 3.7.1)	216 mg

Trace elements

Iron(E 1) (iron sulphate heptahydrated)	100 mg
Jodine (E 2) (calcium iodate anhydrous)	5 mg
Copper (E 4) (cupric sulphate)	10 mg
Manganese (E 5) (manganic sulphate)	350 mg
Zinc (E 6) (zinc sulphate)	250 mg
Selenium (sodium selenite)	30 mg

Natural or corresponding synthetic chemically defined flavouring (aminoacids)

Monohydrate L-Lysine (3.2.3)	88 mg
DL-Methionine (3.1.1)	34 mg
L-Treonine (3.3.1)	120 mg
Aspartic acid	182 mg
Glutamic acid	1,846 mg
Alanine	156 mg

Preservatives

Potassium sorbate (E 202)	2100 mg
Acetic acid (E 260)	20800 mg
Sorbic acid (E 200)	250 mg

Anti-oxidant

BHT (E 321)	50 mg
BHA (E 320)	50 mg

Emulsifying and stabilizing agents, thick

Glyceryl polyethyleneglycol ricinoleate (E 484)	200.000mg
Xanthan gum (E 415)	35 mg
Carrier: water, magnesium sulphate, magnesium chloride, citric acid, Concentrate of selected Inactivated Cultures of <i>Saccharomyces cerevisiae</i> , sodium chloride as needed to 1kg	
Humidity	73.4%

ADMINISTRATION

- Broiler: 1 ml/3-4 L
- Layer/Breeder: 1 ml/5L
- Day old chicks: 1 ml/2L
- Grower/Pullet: 1 ml/2-3L of drinking water for 3-5 consecutive days.

Overdose may cause feed intake troubles.

PACK SIZE

1 L bottle; 5 L tank; 25L tank.

STORAGE

Expiration date refers to a product stored in integral packing, away from heat sources. Avoid exposure to direct sunlight. The product is fit for animal consumption and is free from chloramphenicol nitrofurantoin, melamine, antibiotic and genetically modified organism.

SHELF LIFE

24 months.

Composition may vary in different countries; for further information please contact our technical staff.
